DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mauricio A. Uribe, Reg. # 46,206 on 9/20/07.

The application has been amended as follows:

Please amend claim 25 with the following:

25. A computer system having a processor, a memory, and an operating environment, the operating environment including user mode modules having a first level of protection and kernel mode applications having a second level of protection, the system comprising:

a driver application comprising a processing component for capturing kernel mode module information corresponding to one or more executing processing threads identified in a request to collect kernel mode module information; and

at least one application program interface for accessing the processing component and identifying the one or more executing processing threads from which to collect kernel mode module information: and

wherein the kernel mode module information includes a thread kernel stack and all pending I/O request packet information for each identified process thread; and

wherein all pending I/O request packet information includes an identification of the pending I/O request packet, a current stack location, device object information, file object information and driver object information for each identified I/O request packet corresponding to an identified process thread.

Please cancel claim 30-31.

Please amend claims 26, 28-29, 32 with the following:

26. The ~~architecture~~ system as recited in Claim 25, wherein the at least one application program interface is further operable to identify a pre-allocated memory to received captured kernel mode module information.

28. The ~~architecture~~ system as recited in Claim 25, wherein the processing component is embodied as an operating system resident application.

29. The ~~architecture~~ system as recited in Claim 25, wherein the kernel mode module information includes a list of all loaded drivers.

32. The ~~architecture~~ system as recited in Claim 25, wherein the process component captures the kernel mode module information asynchronously.
